

We all want peace

Von Jutta Besser und David Haysom

I look to the sky - the endless sky
and see no border - how much I try
Dark clouds gather - dark clouds clear
 Tomorrow the wind will again be here

The sun it shines - not just for me
it shines for all - for those who see
It shines for Muslim - Christian - Jew
for Buddhist - Shaman and Hindu

The endless sky so clear and cool
Oh why have I been such a fool
to feel apart from others
instead of seeing them as brothers

*We all want peace - we all want love
We look for happiness - from above
We want to dance - we want to sing
Only together we'll make it swing*

Behind the clouds - the heaven's clear
it brings us hope and stills our fear
I look beyond - the gathering storm
and see a light - a distant form

I see not only - hate and fear
That dim light - it gives me cheer
I'll search once more - as if a child
and build my spirit - be inspired

We've had enough - of strife and war
Let us heal this bleeding sore
and build a new - and lasting peace
that will live and never cease

*We all want peace - we all want love
We look for happiness - from above
We want to dance - we want to sing*

Only together we'll make it swing

Tear down fence - and wall and wire
this has to be our one desire
Search out what - keeps us apart
Look into to our hearts and start

Let us look - at what unites
overlook the fights and plights
And search our souls - for a another way
to change the world and finally say

It matters not which god we serve
Our task is to preserve our nerve
and save mankind from sure disaster
for a lasting world and ever after

*We all want peace - we all want love
We look for happiness - from above
We want to dance - we want to sing
Only together we'll make it swing*

*We all want peace - we all want love
We look for happiness - from above
We want to dance - we want to sing
Only together we'll make it swing*
